

英语阅读测试题流程说明

本次英语阅读测试共有两篇阅读题目，每篇阅读题目共有五道小题，每小题满分为 10 分。本次测试最高可以获得 100 分，最低可以获得 0 分，参试者获得分数越高，得到的被试费将会越高。下述为完成第一篇阅读的具体流程。

第一步：填写基本信息

参试者需要填写姓名和学号，其中姓名需要是中文字符

英语阅读测试题

姓名:

学号:

确定

第二步：放松两分钟后答题

请坐在椅子上，闭上眼睛放松身体，尽量不要去想其他事情，在听到滴声后再睁开眼睛继续实验。

点击开始答题后，进入答题界面。

图 1 放松界面

图 2 点击后，开始答题

第三步：完成第一篇英语阅读题

参试者需要完成所有的题目后，点击提交后跳转到下一个界面。每题答对得 5 分，答错得 0 分。

Technology is never a neutral tool for achieving human ends. Technological innovations reshape people as they use these innovations to control their environment. Artificial intelligence, for example, is altering humanity.

While the term AI conjures up anxieties about killer robots or catastrophic levels of unemployment, there are other, deeper implications. As AI increasingly shapes the human experience, how does this change what it means to be human? Central to the problem is a person's capacity to make choices, particularly judgments that have moral implications.

Aristotle argued that the capacity for making practical judgments depends on regularly making them on habit and practice. We see the emergence of machines as substitute judges in a variety of everyday contexts as a potential threat to people learning how to effectively exercise judgment themselves. In the workplace, managers routinely make decisions about who to hire or fire and which loan to approve, to name a few. These are areas where algorithmic (算法的) prescription is replacing human judgment, and so people who might have had the chance to develop practical judgment in these areas no longer will. Recommendation engines, which are increasingly prevalent intermediaries in people's consumption of culture, may serve to constrain choice and minimize luck. By presenting consumers with algorithmically selected choices of what to watch, read, stream and visit next, companies are replacing human taste with machine taste. In one sense, this is helpful. After all, machines can survey a wider range of choices than any individual is likely to have the time or energy to do on their own. At the same time, though, this selection is optimizing for what people are likely to prefer based on what they've preferred in the past. We think there is some risk that people's options will be constrained by their past in a new and unanticipated way.

As machine learning algorithms improve and as they train on more extensive data sets, larger parts of everyday life are likely to become utterly predictable. The predictions are going to get better and better, and they will ultimately make common experiences more efficient and pleasant. Algorithms could soon-if they don't already-have a better idea about which show you'd like to watch next and which job candidate you should hire than you do. One day, humans may even find a way for machines to make these decisions without some of the biases that humans typically display. But to the extent that unpredictability is part of how people understand themselves and part of what people like about themselves, humanity is in the process of losing something significant. As they become more and more predictable, the creatures inhabiting the increasingly A-mediated world will become less and less like us.

1.What do we learn about the deeper implications of AI?

☐ It is causing catastrophic levels of unemployment.

☐ It is doing physical harm to human operators.

☐ It is altering moral judgments.

☐ It is reshaping humanity.

2. What is the consequence of algorithmic prescription replacing human judgment?

☐ People lose the chance to cultivate the ability to make practical judgments.

☐ People are prevented from participating in making major decisions in the workplace.

☐ Managers no longer have the chance to decide which loan to approve.

☐ Managers do not need to take the trouble to determine who to hire or fire.

3.What may result from increasing application of recommendation engines in our consumption of culture?

☐ Consumers will have much limited choice.

☐ It will be easier to decide on what to enjoy.

☐ Consumers will actually enjoy better luck.

☐ Humans will develop tastes similar to machines

4.What is likely to happen to larger parts of our daily life as machine learning algorithms improve?

☐ They will turn out to be more pleasant.

☐ They will repeat our past experience.

☐ They can be completely anticipated.

☐ They may become better and better.

3.Please determine which of the following four sentences does not have a grammar error and select the correct option.

☐ But to the extent that unpredictability is part of how people understand themselves and part of what people like about themselves, humanity is in the process of losing something significant.

☐ As unpredictability is a component of how individuals perceive themselves and what they appreciate in themselves, humanity is currently forfeiting something substantial

☐ Inasmuch as unpredictability plays a role in people's self-perception and self-liking, humanity is gradually relinquishing something of great value

☐ Although unpredictability is part of how people perceive themselves and what they like about themselves, humans are gradually losing something important

提交

第四步：填写第一篇阅读的问卷

参试者完成所有题目后，需要填写一份问卷，一份问卷共有 5 题。每小题都需要填写一次问卷，需要根据当前题目选择选项，一篇阅读需要完成五份问卷，共 25 道题目。问卷选项不计入得分。

问卷第 1 题，希望你能对做左侧出现的题目情况做出判断，判断当前题目是否做对。
问卷第 2、3 题希望你能在做左侧出现的题目时，心理努力程度打分，评价采用 9 分制，请选择最符合的数字分数。
问卷第 4、5 题希望你能在做左侧出现的题目时，情绪体验打分，评价采用两个维度 9 分制，请选择最符合的数字分数。

效价维：指你觉得在做题过程中让你觉得愉悦的程度，愉悦程度越高，代表着你越开心，评分越大（最高 9 分），愉悦程度越低，代表着你越不开心，评分越小（最低 1 分）。

唤醒维：指做题过程中这道题让你觉得兴奋的程度，兴奋程度越高，评分越接近 9；兴奋程度越低，评分越接近 1。

图 4 第一篇阅读第 2 题的问卷

第五步：第一篇英语阅读题的错题重做

在界面的右侧会出现之前做错的题目，参试者需要选择自己需要的提示后，才可以答题。

- 如果选择“不用提示”，答对得 8 分，答错 0 分；
- 如果选择“一级提示”，答对得 6 分，答错 0 分；
- 如果选择“二级提示”，答对得 4 分，答错 0 分。

将鼠标停留到提示按钮上 2 秒，会提示选择该提示，答对获得多少分

图 5 右侧将出现在第一篇阅读中做错的题目

图 6 需要选择需要的提示后，对错题进行重做

完成第一篇英语阅读题后，直接进入第二篇英语阅读题。第二篇阅读的具体流程，与第一篇阅读第三、四、五步相同。最终获得分数为第一篇阅读和第二篇阅读的总和。
